## DETAILED ACTION

### *Continued Examination Under 37 CFR 1.114*

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on October 12, 2005 has been entered.

### *Response to Amendment*

2. Applicant's amendment under 37 C.F.R. 1.116, filed on September 13, 2005 has been considered and entered in full.

3. Applicant's arguments with respect to respective amended claims in last 2 paragraphs on page 6 of the amendment filed September 13, 2005 have been considered and are persuasive. Therefore rejections on claims 1-10 are withdrawn.

### *Allowable Subject Matter*

#### Reasons of Allowance:

6. Claims 1-10 are allowed.

The following is an examiner's statement of reasons of allowance:

Both the instant invention and the closest prior art Wu, U.S. Patent No. 6,584,154, are directed to a motion image decoding apparatus for decoding compressed image data obtained through timebase predictive coding effected to compress a motion image. The instant invention further recites the limitation "said switching of the rounding system corresponding to alternating between a first rounding process including adding a first value to or subtracting the first value from a numeral value and dividing result by a second value, and a second rounding process including adding a third value to or subtracting the third value from the numeral value and dividing result by the second value, **the third value being equal to two times the first value**" in claims 1 and 10 which is not taught by the prior art of record. Therefore claims 1 and 10 are allowed. All other claims depending on claims 1 and 10 are allowable at least by dependency on claims 1 and 10.
